

We are always on the look-out for independent IT engineers

The engineer will work in conjunction with our technical supervisor and will have the following main missions:

- perform on-site technical interventions at TechSwap customers
- guarantee customer satisfaction through a solution-minded approach in the framework of each specific Service Level Agreement (the L.A. specifically defines the timing, benefits, methods, and reporting of each intervention).

This function requires a good sense of organization, respect for procedures and the ability to solve technical problems.

The people we are looking for will meet the following criteria:

- technical training in computer science
- learning ability for each new type of service
- good presentation
- good speech (bilingual for Brussels)
- status of independent (or company) with VAT in order
- driver's license B and vehicle (utility or station-wagon)
- motivated by customer service

We offer:

- interesting work at a growing company
- the ability to manage the workload according to personal constraints
- attractive revenue opportunities

Workplace: your residential region (Brussels, Wallonia or Flanders)
